

Programme code: 69-41-L/02

Length and mode of study: 4 years, fulltime

Aimed to: elementary school graduates

Graduation examination: Maturita exam

### Programme characteristics

The study programme professionally follows former physiotherapy which is nowadays taught at universities. The graduates are included into personal and operational services.

The main task of this programme is providing various types of massages and treatment according to needs of an individual patient. The next competence is providing advisory services in the area of physical activities, healthy lifestyle and body care. Teaching is realized in specialised classrooms equipped with massage tables and other special aids.

The graduates use two foreign languages in professional communication and PC skills including the Internet. Pupils are taught to be precise, polite and to follow regulatory compliance and ethic.

After successful graduation pupils are educated to obtain useful knowledge, skills and habits as well as necessary general education to be able to continue in their study at schools of higher education or universities focused on medical and social field.

### Job opportunities

After successful graduation graduates are ready to provide professional massage services in their own studios, fitness and wellness centres, spa resorts and sport clubs. They can also assert themselves in the area of social services, e.g. in senior homes.

The graduates work independently within preventive, reconditioning and recovery programmes as well as in various types of entrepreneurial subjects in the area of rehabilitation services. After some practice in a private sector the graduates can do business in massage, reconditioning and recovery services.

After graduation there is also a possibility to obtain a trade certificate. Registered capital is not required for entrepreneurial in this area.

The graduates can continue their studies at:

colleges of higher medical education

universities focused on social area – bachelor's and master's degree

medical faculties (Prague, Pilsen, Hradec Králové, Olomouc, Brno)

other universities
